

ISO 27001

LEAD AUDITOR

I27001LA

ISO 27001 LA Version 112022

CertiProf[®]

Introduction:

This certification covers the international standard published by the International Standardization Organization (ISO), which describes how to manage and improve information security, cybersecurity and privacy protection in a company. ISO 27001 can be implemented in any kind of organization, profit or non-profit, private or government-owned, small or large. It was written by the world's best experts in the field of information security and provides a methodology for the implementation of information security management in an organization. This standard also allows companies to get certified, which means that the organization has implemented information security according to ISO 27001.

Learning Objectives:

1. Understand the principles, concepts and requirements of ISO/IEC 27001:2022.
